FOCUS

FPM-02 XY MONITOR

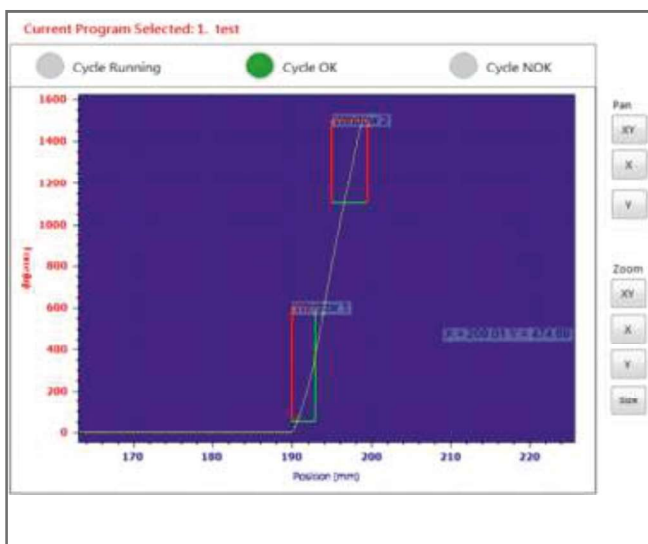

FEATURES

- Hi-speed analog signal channels for force and LVDT
- PC based HMI
- Suitable for all types of pneumatic and hydraulic presses
- Force x displacement graph monitors through various limit windows
- Data storage on SD card or pen drive
- 1000 samples / sec for load cell and displacement signals
- 7 inch touch screen
 - Graph of Position x Force
 - History mode for monitoring stored graphs
 - Selected program name
 - Program mode to change parameters and creating new recipes
 - Job Counter
- Interface
 - Analog input (0-10v) for load cell and 24 bit resolution
 - Analog input (0-10v) for LVDT and 24 bit resolution
 - 8 nos. of digital input and output for PLC control
 - RS-422 for data communication with PLC
 - USB for data storage
- LEDs provided on front for result display
- Beeper for OK signal

INTERFACING

SOFTWARE

- Configuration of Load cell and LVDT
- Max 4 limit windows for a program
- Various types of limit window
- All curves along with result stored on PC.
- History view from SD card and PC
